IMPORTANT INFORMATION

An application for open-space special valuation does not have to be filed annually once such valuation is granted; however, the Chief Appraiser may require a new application to be filed to confirm that the land is currently eligible for agricultural use special valuation. If not completed in full, the application **WILL BE DENIED**.

The property subject to open space valuation must show a history of five years out of the last seven years of agricultural use, if not inside an incorporated city or town. If the property falls into an incorporated city or town it must show a five-year history of continuous agricultural use out of the past five years in order to qualify for special valuation.

If the application is granted after being filed late (only until certification), the owner is liable for a penalty of 10% of the difference in the amount of the tax imposed on the property and the amount that would have been imposed if the property were taxed at market value.

You must notify the Chief Appraiser in writing if you: stop using your property for agricultural use (e.g., you voluntarily decide to stop farming); change the category of your use (e.g., you change from dry cropland to improved pasture); you change the level of your use (e.g., you substantially increase or decrease the number of cattle you raise); you change the nature of your use (e.g., you switch from growing corn to growing ornamental plants); you enter, leave, or change governmental programs (e.g., you put 100 acres in CRP); or if you begin using your land for something other than agriculture (e.g., you build a shopping center on most of your land). You must deliver this notice no later than April 30 following the change in use or eligibility. If your land receives agricultural appraisal and you fail to notify the Chief Appraiser of a change in agricultural use, you may be required to pay a penalty. You will be required to pay a substantial additional tax plus interest (a rollback tax) if you stop using all or part of the property for agriculture. In addition, a penalty will be imposed if the owner fails to notify the Chief Appraiser in writing before May 1, after the eligibility for agricultural use land valuation ends or after a change in category of agricultural use. This penalty will be equal to 10% of the difference between the taxes imposed on the property in each year that the property was erroneously allowed special valuation and the taxes that would otherwise have been imposed.

BEEKEEPING

The State of Texas has set a minimum of 5 acres and a maximum of 20 acres to qualify beekeeping as an agricultural use.

The applicant must provide a plan specifying the following: - Type of Bees; - Number of hives; - Map with location of hives and plant life; - List of vegetation for hive's food source (all plant life intended to support hives); - Marketing plan for production; - Size of property to be used for beekeeping; - Information about bee migratory habits.

Our degree of intensity standard is set at a minimum of six colonies (hives) on the first 5 acres with 1 hive per additional 2.5 acres up to 20 acres. The productivity value for beekeeping will be based upon the Dry Cropland productivity value. The hives must be maintained and kept alive. The agricultural productivity appraisal will be on the total acreage, not just the area where the hives sit.

Texas Apiary Inspection Service application and Supplemental Questionnaire are available upon request.
